

Guillermo Maldonado Gil

Backend Software Engineer · Full-Stack Developer

📍 Cochabamba, Bolivia ✉ guillermomaldonadodev@gmail.com ☎ 69997206

🌐 portafolio-guillermomaldonado.netlify.app 🌐 [guillemaldonadodev](#) 🎧 GuilleMG10

Profile

Backend Software Engineer specialized in scalable REST APIs, Clean Architecture, and full-stack development. Proven experience delivering and maintaining production-ready systems for the healthcare, fitness, and construction sectors. Competitive programmer and technical leader who leverages AI developer tools to accelerate workflows, optimize architecture, and enhance code analysis, maintaining rigorous engineering standards without relying on shortcuts.

Portfolio: Detailed case studies, full tech stacks, and live links for all the projects below are available at portafolio-guillermomaldonado.netlify.app.

Skills

Backend & Cloud: NestJS, Node.js, FastAPI, PostgreSQL, Prisma, TypeORM, REST APIs, Microservices, Docker, CI/CD

Frontend: React, Next.js, Tailwind CSS

Programming: TypeScript, JavaScript, Python, C++, SQL

Architecture & Security: Clean Architecture, SOLID, System Design, JWT, RBAC

AI Developer Tools: Claude Code, Gemini Pro, ChatGPT, Codex (Utilized strictly as productivity multipliers and analytical aids, not as coding shortcuts)

Spoken Languages: Spanish (Native), English (B2+)

Experience

Independent Software Agency, Backend Engineer

Cochabamba, Bolivia

June 2023 – present
3 years

- Led backend architecture and technical decisions for 5 production systems across the healthcare, fitness, construction, and non-profit sectors.
- Designed and deployed scalable REST APIs using NestJS, Node.js, and TypeScript, currently handling daily active usage by clients.
- Managed the full software lifecycle from requirements gathering to complex relational database modeling, RBAC implementation, and maintenance.
- Developed full-stack solutions by integrating React/Next.js frontends with robust backend services.

Waverley Software, Software Developer Intern

Bolivia

Oct 2025 – Dec 2025
3 months

- Researched CNN (Convolutional Neural Network) architectures for integration into software products.
- Produced technical documentation and comparative analysis to support engineering decision-making.

AndeanUX, Software Developer Intern

Bolivia

July 2025 – Nov 2025
5 months

- Developed frontend components integrated with backend services and collaborated with UX/UI teams to improve the end-user experience.

Projects

Cost Management System (Undergraduate Thesis)

Aug 2025 – Apr 2026

Microservices-based full-stack platform (NestJS, Next.js, PostgreSQL) applying Clean Architecture and SOLID principles. Scored 100/100 and graduated with Honors.

ACS Bolivia Web Platform Official platform for the American College of Surgeons chapter. Features a high-traffic public landing page and a secure, role-based private admin panel for congress management.	Mar 2026 – May 2026
Coninarde Construction ERP Centralized REST API for tracking projects, budgets, and materials across active construction sites with CI/CD deployment.	Feb 2026 – June 2026
Gym Management Software Custom REST API tailored for daily gym operations, handling the full membership lifecycle, attendance tracking, and payment control.	June 2023 – Nov 2024
Clinic Admin System Secure administrative backend managing clinical appointments, detailed patient records, and treatment histories with strict RBAC.	June 2024 – June 2025

Education		
B.S.	Universidad Católica Boliviana "San Pablo" , Systems Engineering • Graduated with Honors — Final Project Score 100/100.	Cochabamba, Bolivia Feb 2021 – Apr 2026
	Universidad del Salvador , Academic Exchange — Systems Engineering • Focus logic programming (Prolog), natural language processing, and neural network architectures.	Buenos Aires, Argentina July 2024 – Dec 2024

Awards and Leadership		
Competitive Programming: 6th place nationally at ICPC Bolivia 2023. Consecutive ICPC participation (2022–2025) and attendee at international training camps (Buenos Aires 2023, Rosario 2024).		
Leadership: President of the Systems Engineering Student Council at UCB (2024–2026), managing national-scale academic events and institutional representation.
